

# BRYAN KOH YUAN HAO

## ABOUT ME

I am a passionate self-learner of software technology who is studying at Monash University. I prefer to venture outside of university material and dive into resources that I feel are more useful and practical. I would describe myself as a self-study guy instead of a university student.

## EDUCATION

Monash University (On-going)  
**Bachelor of Data Science in  
Computer Science**

Taylor University  
**ATAR score 94.85**

## CONTACT

- 6012-5001190

## SELF STUDY EXPERIENCE

### Backend Python Web Server

Familiar with the overview of Web Frameworks such as Django, Fastapi with OAuth, JWT, ORM of SQL, Docker and Database Schema Migration.

### System Architect

Familiar with the concept of Web Server, Load Balancer, Message Queue, Master-Slave Database replication,

### Data Science

Have experience with Kaggle, numpy, pandas and scikitlearn. Understand concept of supervised and unsupervised learning with algorithm such as Random Forest, SVM, Linear and Logistic regression, K-mean and PCA.

### Distributed Ledger Technology

Currently trying to learn Hyperledger Fabric and its use cases in streamlining the post-trade reconciliation process avoiding millions of payments to overnumbered of lawyers and bankers.

## PERSONAL NOTE

I have the ambition to be the best in my field and have a high curiosity for knowledge.
